SUMMARY

Backend Software Engineer with 3+ years of experience building scalable backend systems, recommendation pipelines, and optimization tools using Go, Rust, Python, and TypeScript. Experienced in distributed systems, event-driven architectures, and data-intensive applications.

EXPERIENCE

Veepee

Dec. 2023 – Sep. 2025

Software Engineer — R&D (Apprenticeship)

Paris, France

- Built embedding-based recommendation pipelines for product affinity scoring and personalized marketing campaigns using JinaAI, vector embeddings, and cosine similarity.
- Contributed to distributed data pipelines and backend integrations using **Kafka, Go, ASP.NET, and Next.js**.
- Developed a **Python-based packing optimization algorithm** to reduce placement errors in the Manhattan warehouse management system (combinatorial optimization, geometric modeling).
- Built a **real-time 3D visualization tool** with Three.js to analyze packing efficiency and detect invalid placements for internal warehouse teams.

Adcoin — Station F

Apr. 2022 – Aug. 2023

Software Engineer (Internship + Apprenticeship)

Paris, France

- Contributed to a blockchain-based digital advertising platform; developed backend REST APIs using **Express.js** for campaign management and user workflows.
- Integrated frontend applications with Web3 services and internal APIs; contributed to mobile features using **Flutter**.
- Worked in an agile environment across full-stack features from scoping to production.

Mustach

Apr. 2021 – Jul. 2021

Frontend Developer (Internship)

Remote

- Developed and customized **React.js** themes for Shopify clients; gathered requirements and delivered tailored e-commerce solutions.

EDUCATION

Efrei Paris

2023 – 2025

Master's Degree in Software Architecture & Development

Villejuif, France

- Thesis: Optimization of recommendation systems and personalized marketing campaigns via embedding-based modeling (NLP & ML)

Efrei Paris

2020 – 2023

Bachelor's Degree — Web Development & Computer Programming

Villejuif, France

TECHNICAL SKILLS

Languages : Go, Rust, Python, TypeScript, C#

Backend : ASP.NET, NestJS (Node.js), Express.js, REST APIs, Microservices

Frontend : React, Vue.js, Three.js, Next.js

Infrastructure : Kafka, Docker, Kubernetes (airgap, multi-zone), Vault HA, cert-manager

Observability : Prometheus, Loki, Tempo, Falco

CI/CD & GitOps : GitHub Actions, GitLab CI/CD, ArgoCD, Argo Rollouts, Gitea Actions, Chaos Mesh

IaC & Security : Terraform, Ansible, OPA, PSS, NetworkPolicies, Cosign

Concepts : Distributed Systems, Event-Driven Architecture, Recommendation Systems, Vector Embeddings, Optimization Algorithms

Languages : English (fluent), French (native)
